Physical Description 1

The Wallen Road Bridge is a road bridge which connects Swan Street, Richmond, with Wallen Road (which becomes Riversdale Road), Hawthorn.

The structure comprises four steel girder spans supported on cross-braced circular hollow section columns. The deck carries four lanes of traffic, including two tram tracks, and has a footpath on either side.

The 1916 ornamental tram wire supports are simple steel structures with supports on either side of the roadway. The curved brackets are embellished with steel scrollwork.

Integrity

not assessed

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
