Heritage Inventory History of Site:

The Indigo Lead was discovered in 1858 and attracted thousands of diggers. The 'dry' (i.e., shallow) ground at the upper end of the lead was worked mainly by Chinese sluicers and puddlers from 1860 onwards. Deep workings were confined to the lower end of the lead.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
