NORTH GRENVILLE COMPANY

03.1864: returning large quantities of gold weekly.

06.1864: struck a good gutter to the west of the shaft.

09.1864: considerably improved; gutter found to be running parallel with the southern boundary will give them hundreds of feet of wash that was not expected.

12.1864: broken into the gutter coming from the Morning Light or Oldham Lead and their yield rose from 60 to 80 ozs per week.

03.1865: making extensive main drives.

06.1865: improving and when the main drives are completed it will give excellent returns.

09.1865: improving and promising good results.

12.1865: marked improvement.

03.1866: regularly at work and doing well.

06.1866: last week's yield was 105 ozs; discussing the possibility of sinking a new shaft to allow working of the unworked portion of their claim.

09.1866: continuing to give excellent returns; machinery purchased for the sinking of another shaft.

12.1866: yielding better than ever.

03.1867: yield from their old shaft is indifferent; sinking a new shaft and erecting machinery thereon

09.1867: new shaft completed and works will be transferred there soon; giving moderate returns.

03.1868: yield for the quarter 836 ozs 11 dwt 13 gr.
