## Physical Description 1

This building was constructed for the Y.M.C.A in 1908 to the design of Architects: Barlow Molloy and Chandler. Alfred Deakin laid the foundation stone on 17th July 1908.

The design of the building is somewhat clumsy. The corner turret surmounted by pepper-pot dome provides a degree of interest. The oriel window to the side elevation with delicate lead lighting breaks up a large unpainted facade.

The building provides a strong corner streetscape component. It is in good condition is relatively intact, and is of local importance.

## Integrity

SUBSTANTIALLY INTACT
