Heritage Study/Consultant	Ballarat - Ballarat Conservation Study, Jacobs Lewis Vines Architects, 1978; Ballarat - Ballarat Heritage Review, Andrew Ward, 1998;
Construction dates	1888,
Architect/Designer	Figgis, Charles Douglas, Tappin, Gilbert & Dennehy,
Hermes Number	120446
Property Number	

Physical Description 1

This building, constructed in 1888 to the design of C.D.Figgis and Tappin, Gilbert & Dennehy, is of an unusual and striking composition. Originally there was a simple tower (visible in an early photo) surmounting the eastern end of the facade, but this has since been removed without disturbing the harmony of the facade.

The composition is very flamboyant. The curved Byzantine arch of the pediment over the entrance bay is very unusual as are the heavy face brick columns supported on urns. The projecting bay has finely moulded window heads to the ground floor. The balustrading at three levels serves to unify the composition.

The interior is substantially intact, and the stairwell and billiard room are of considerable note.

This building is of importance for the unusual external design elements and the relatively intact interior. The juxtaposition of eastern motifs (the curved arch and heavy columns) with high Victorian boom style architecture make this building unique and one of utmost importance. The building is in good condition and provides an important streetscape element.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
