Statement of Significance

Last updated on - November 1, 2009

Statement of Significance as recorded under the Queenscliff Heritage Study 2009

Warley Cottage and *Shenfield Cottage* are of local historical and architectural significance as a pair of finely detailed and broadly intact semi-detached late Victorian timber houses built (unusually) without a common fire wall. They are also of historical significance for their association with the Priddle family, with William Priddle, a local builder, erecting both of the houses.

Heritage Study/Consultant	Queenscliffe - Queenscliffe Urban Conservation Study, Allom Lovell & Associates P/L, Architects, 1982; Queenscliffe - Queenscliffe Heritage Study, Lovell Chen, 2009;
Construction dates	1885,

Physical Description 1

The duplex is built of timber, is hip-roofed and possesses a concave roof verandah of timber posts and capitals, panelled cast-iron and finished brackets (the friezes on

Shenfield cottage are missing). Each cottage had pronounced timber eaves-brackets, single window bays(6) and, originally, there was a painted picket front fence where now there is a double palisade, square-head picket.

This duplex construction-form, combined with an undivided hipped roof and timber materials, is unusual in Queenscliff and elsewhere because of early fire-separation requirements which tended to break the roof-line and destroy the intended visual illusion of the duplex being one large house. The cottages when intact, were a well detailed and designed example of their type, the window bays and the panelled iron work lending further distinction.

Physical Description 2

Warley Cottage & Shenfield 1880s low hip roofed duplex weatherboard cottages with concave verandah roof and cast iron locework.

Unusual construction form for the town, basically intact.

Physical Description 3

Extract from the 2009 study

Warley Cottage is a double-fronted weatherboard Victorian cottage with a hipped roof clad in corrugated galvanised steel sheeting, which is one of a pair of semi-detached houses (94 and 96 Hesse Street). The dwelling is set back from the street by a shallow garden. A timber picket fence extends along the street boundary. The house has eaves brackets and a concave profile roofed verandah with timber posts and cast iron fretwork. A central door is flanked on one side by a double-hung sash window and on the other side by a canted bay window. The house has two rendered brick chimneys with Classically-inspired mouldings at their tops.
