### What is significant?

### How is it significant?

### Why is it significant?

Part of Recommended Area A1.1.

No SoS provided in this citation. Please refer to descriptions, history, construction, loc govt, listings and images sections in this place record for further information.

Heritage Study/Consultant Ballarat - Ballarat Conservation Study, Jacobs Lewis Vines Architects, 1978;

Construction dates 1862,

Hermes Number 120896

## Physical Description 1

The goods sheds were constructed by Irving Glover and Co., whose tender of £18,326.0s.6d. was accepted on 4.4.1862.

This building is a huge version of the many basalt railway goods sheds constructed on the Ballarat-Geelong and Melbourne to Bendigo lines. It would appear to have been constructed in 1862 to its present size~ as indicated in the contract sum, when compared with the single carriage shed and by the early photograph of the Station. This building is a long double gabled shed with arched rail entrances at the east end, and with segmental arched side goods doors. There are now a number of modern awnings over the doors.

The building is substantially intact, apart from the awnings and late~ roofing.

This building is of importance because of its scale, construction materials and workmanship, and its relationship to the other buildings of this important railway terminal complex.

## Integrity

### SUBSTANTIALLY INTACT
