Vic. War Heritage Inventory

Heritage Study/Consultant	Wodonga - Wodonga Heritage Study Stage 1, Freeman Randell, 2004;
Construction dates	1950,
Hermes Number	125549
Property Number	

Physical Description 1

A small isolated shelter shed about 3 metres wide by 4.5 metres long, set in an open park-like area at the south-west quarter of Latchford base. It is not identified on the Hyder or Army site plans. The shelter is made from pre-fabricated galvanised sheet steel panels, with three panels in the long sides and two panels in the ends. At the northern end one panel has a steel door. The other panel at that end, and all panels on the other sides, have shallow-ribbed steel sheets (rather like Weatherwall) covering the bottom half and open fly-wire screens in the top half. The shallow-pitched gable roof has large-pitch corrugated sheet steel cladding, rather like the Stores 028 & 029, and this shed is possibly of the same vintage, ie c1950s or 1960s. The roof has about 1 metre wide overhang on three sides, and about 3 metres overhang at the northern end forming a porch. The shed is set directly on the ground, with an internal loose duckboard-style wooden floor. In and around the shelter there are bench seats made of wooden planks supported by short lengths of sawn tree trunk. The shelter is in fairly good condition, but could deteriorate due to accumulated leaf litter on the roof.

Veterans Description for Public

Bonegilla Shelter Shed consists of a small isolated structure about 3 metres wide by 4.5 metres long, set in an open park-like area at the south-west quarter of Latchford base. It is not identified on the Hyder or Army site plans. The shelter is made from pre-fabricated galvanised sheet steel panels, with three panels in the long sides and two panels in the ends. At the northern end one panel has a steel door. The other panel at that end, and all panels on the other sides, have shallow-ribbed steel sheets (rather like Weatherwall) covering the bottom half and open fly-wire screens in the top half. The shallow-pitched gable roof has large-pitch corrugated sheet steel cladding, rather like the Stores 028 & 029, and this shed is possibly of the same vintage, ie c1950s or 1960s. The roof has about 1 metre wide overhang on three sides, and about 3 metres overhang at the northern end forming a porch. The shed is set directly on the ground, with an internal loose duckboard-style wooden floor. In and around the shelter there are bench seats made of wooden planks supported by short lengths of sawn tree trunk. The shelter is in fairly good condition, but could deteriorate due to accumulated leaf litter on the roof.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
