National Trust

Statement of Significance

Last updated on -

Contribution to landscape

Outstanding size

Aesthetic value

Outstanding example of species

This Moreton Bay Fig (*ficus macrophylla*) is located on the north-west corner of Kelly park. The expansive evergreen canopy and height of this specimen is a recognised landmark in the City of Wyndham. The landscape use of this species of native fig in the layout of the park reflects a planting style of the late nineteenth to early twentieth centuries which utilised large tree specimens with bold foliage.

Measurements: 05/08/2012
