National Trust

Statement of Significance

Last updated on -

Curious growth form

This specimen has a highly unusual growth form. The tree has fallen onto its side (likely during a flood) but survives and continues to grow laterally. At least two main branches have been covered in part by sediment, so they disappear underground and re-emerge some metres away.

Measurements: 05/10/2004

Height (m): 17

Spread (m): N-S 24.5; E-W 28

Estimated Age (yrs): 100+

Condition: Good

Access: Restricted
