Heritage Listing

Greater Bendigo City

Statement of Significance

Last updated on -

It is extremely rare to find a puddling machine for which there is documentary evidence which can confirm its provenance. This appears to be the case for both puddling machines at this site (criterion A). Puddling machine technology, whilst initially imported, was developed further in Victoria and was particularly important for the early development of alluvial mining in this state (criterion A). The ability to be able to construct a dateable sequence of puddling machines is particularly important for the purpose of dating other sites for which there is little or no documentary evidence (criterion C).

Heritage Study/Consultant	Greater Bendigo - Marong Heritage Study 1999, Andrew Ward and Associates, 1999;
Construction dates	1858,
Other Names	Water Reserve, south side of Scott's Road, Neilborough,
Hermes Number	198117
Property Number	

Physical Description 1

About 10 metres south of Scotts Road is a dam, still holding water. Between the road and dam, there is a weathered outline of a puddling machine, with a possible second puddling machine to the east.

Physical Description 2

The site is bounded by Scotts Road on the north and by a line 30 metres beyond the normal high-water level in the dam.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
