
Ficus macrophylla

Location

319 Hallam Road North Lysterfield South, CASEY CITY

Municipality

CASEY CITY

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - January 1, 1900

What is significant?

Twelve (12) *Ficus macrophylla* (Moreton Bay Fig) located in a garden in Lysterfield South.

How is it significant?

These twelve (12) *Ficus macrophylla* (Moreton Bay Fig) are significant for social, scientific and historic reasons at Regional level.

Why is it significant?

These twelve (12) *Ficus macrophylla* (Moreton Bay Fig) are significant for their size at an average of 15m height, circumference of 3.7m and canopy spread of 20m. All trees are approximately the same size, with the exception of the north-west corner where the trees are more closely planted and somewhat suppressed. These trees are a fantastic old planting of Moreton Bay Figs in a heritage garden setting. They make a significant contribution to this neighbourhood and historic garden in Lysterfield South. The property, 'Warren Park' was built sometime between 1848 and 1856, with an extension in 1966. Photographs of the property around 1968 show these Moreton Bay Figs as mature, and it is likely that it was planted around time the house was constructed in the 1850s. The property 'Warren Park' is included in the National Trust Heritage Register as File Only (B2211).

Other Names Moreton Bay Fig,

Hermes Number 202790
