Property Number

Physical Description 1

This unusual tree of 10-11m height is located in the front garden of an inter-war house and may date from that period. It is the only known example within Hobsons Bay and is thought to be rare within the metropolitan context in private gardens. Another similar example is listed on the National Trust Significant Trees Register within Glen Eira City Council (*Harpephyllum caffrum* Bernh. ex C.F.Krauss) at the north-west corner of Caulfield Town Hall, Glen Eira Road, near Hawthorn Road intersection.

Botanica (1997) provides the following description:

This dense, broadly domed tree grows to 40 ft (12 m) tall and about as wide, with an erect, short trunk. Its deep green, compound leaves resemble those of an ash (Fraxinus), and inconspicuous whitish green blossoms appear near the branch tips. On fertilized female plants the blossoms are followed by small, oval fruit the size of a small plum that ripen to orange-red; these are tart tasting but make excellent jam. [Botanica]

Physical Conditions

Condition

Good.

Physical Description 2

Context

The tree contributes to the inter-war house garden.
