Statement of Significance

Last updated on -

Low archaeological significance.

Interpretation of Site Grazing, cultivation, pastoral and domestic activities, from mid 19th C to present.

Archaeological
Significance Low archaeological significance. Common site type throughout Victoria. Investigation of this site together with other Hill Farm sites may result in a higher assessment of significance.

Historical
Significance Associated with very early use of the site and historical persons in the region. Low regional historical significance.

Hermes Number 28776

Property Number

History

The site was originally part of the large May pastoral run in the 1840's. May was subdivided in the early 1850's and allotment 36 (152 acres) was purchased by E. Mitchell and J. Close in 1852, who grazed stock on the property, and leased part of it to J. Jennings. Jennings cultivated part of this land and grazed stock on the area leased from Close and Mitchell. The site is situated in grazed area, which appears to have been under continual grazing since the late 19th century.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
