Statement of Significance

Last updated on - July 10, 2008

The site is significant as the location of the first discovery of coal in Victoria (Port Phillip District of New South Wales) in 1826. The site is also significant as a physical link to the short-lived military and convict settlement at Corinella, Western Port Bay.

Interpretation of Site The exposed seams dipped back under the land, and were later mined by shaft.

Property Number

History

Late in 1826, William Hovell, accompanied by two soldiers and two convicts was sent on an official expedition from the small military and convict settlement at Corinella on Western Port Bay to find coal. Travelling east along

the coast, he found coal outcrops on the shoreline west of Cape Paterson on 18 December 1826. The coal seams were later accessed via shaft, sunk inland of the outcrops. The outcropping seams are still visible today, and mark the first discovery of coal in Victoria.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
