Statement of Significance

Last updated on - May 13, 1999

What is significant?

The Hawthorn Fire Station was constructed in 1910 to the design of Cedric Ballantyne of the architectural firm of Oakden and Ballantyne. The two storey asymmetrically planned, red brick building consists of a fire station at ground floor level and two flats above. The building is designed in the Edwardian Freestyle and its most notable features are its arched vehicle openings with original timber doors, and its Art Nouveau wrought iron detailing. Apart from minor and reversible modifications the building is remarkably intact and retains all the features of a small suburban fire station.

The Hawthorn Fire Station is architecturally and historically important to the State of Victoria.

The Hawthorn Fire Station is architecturally important as a particularly successful adaptation of the Edwardian Freestyle to a domestically scaled suburban fire station. It is also important as a design of then noted architect Cedric Ballantyne of the firm Oakden and Ballantyne who designed most of the Metropolitan Fire Brigade's buildings in the early twentieth century.

The Hawthorn Fire Station is historically important as an outstanding and virtually intact example of a small suburban fire station. The building is important for its ability to demonstrate the way of life, accommodation and methods of work in an early twentieth century fire station. The high degree of intactness and retention of original fabric in the face of pressures for modernisation increase the buildings significance.

Permit Exemptions

General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must [notify](#) the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.

Find out more about heritage permit exemptions [here](#).

Specific Exemptions:
