## Statement of Significance

Last updated on - May 11, 1999

The Number One Lead Gold Mining Precinct is an excellent and unusual example of shallow sinkings for alluvial gold. The site consists of the relics of mines in open country fronting Number One Creek near Avoca. The precinct displays evidence which is typical of the prevailing early gold mining technology of the box-ironbark forests of central and western Victoria from the 1850s. It is unusual in today's context because the open nature of the site allows a clear view of all the workings evoking a more accurate image of what the diggings were like when they were active than is possible on sites where the forest has been regenerated.

The Number One Lead Gold Mining Precinct is of historical, archaeological and scientific importance to the State of Victoria.

The Number One Lead Gold Mining Precinct is historically and scientifically important as a particularly fine and essentially intact example of a site associated with the earliest forms of gold mining which, from 1851, played a pivotal role in the development of Victoria. Number One Lead, although not a particularly rich site, was a significant component of the historically important Pyrenees diggings and is also important for its low level of physical disturbance since the nineteenth century.

The Number One Lead Gold Mining Precinct is archaeologically important for its potential to yield artefacts which will be able to provide significant information about the cultural history of gold mining and the gold seekers themselves.

## Permit Exemptions

### General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

**Places of worship:** In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must **notify** the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

**Subdivision/consolidation:** Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.
