Statement of Significance

Last updated on - May 11, 1999

What is significant?

The Royal Standard Gold Battery Site consists of the remains of three 5-head stamp batteries, waterwheel, two Cornish boilers, metal chimney flue, and equipment for working an inclined tramway. The battery, boilers and waterwheel, etc., are remnants of crushing facilities put in to serve mines working along Standers Creek. The site is badly obscured by blackberry bushes.

How is it significant?

The Royal Standard Gold Battery Site is of historical, and scientific importance to the State of Victoria.

Why is it significant?

The Royal Standard Gold Battery Site is historically and scientifically important as a characteristic and well preserved example of an important form of gold mining. Although the battery has collapsed, the machinery has not been significantly scavenged. Gold mining sites are of crucial importance for the pivotal role they have played since 1851 in the development of Victoria. As well as being a significant producer of Victoria's nineteenth century wealth, with its intensive use of machinery, played an important role in the development of Victorian manufacturing industry. The abandoned mining machinery at the Morning Star battery site is historically important for its evocation of the adventurousness, hardship, and isolation that was part of mining life in the high country areas of the State.

The Royal Standard Gold Battery Site is archaeologically important for its potential to yield artefacts and evidence which will be able to provide significant information about the technological history of gold mining.

Permit Exemptions

General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must [notify](#) the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.

Find out more about heritage permit exemptions [here](#).
