Statement of Significance

Last updated on - January 1, 2008

St Paul's Church is of local historical and architectural significance. It is a rare Gothic revival church built by the prominent architectural firm of Reed Smart & Tappin and it became the historic focus of the Catholic faith in Coburg and the northern suburbs. It is the principal component of the St Paul's complex and it has the longest nave of any church in Coburg.

Heritage Study/Consultant	Moreland - City of Coburg Heritage Conservation & Streetscape Study, Timothy Hubbard Pty Ltd, 1991; Moreland - City of Moreland Heritage Review, Allen Lovell and Associates, 1999;
Construction dates	1894, 1928, 1938,
Architect/Designer	Reed, Smart & Tappin,
Hermes Number	59112

Physical Description 1

St Paul's Church is a red brick gothic revival building with a tower at the south-west corner, topped with a metal-clad spire and a crucifix. The multiple gabled roofs are slate. The brick parapets and window openings have cement rendered dressings. The west elevation has a round leadlight window above a triple-arched entrance porch

The plan is a full Latin cross. Notable elements include large brass doors, and a wagon-headed ceiling supported by richly-moulded principals springing from carved corbels. Diagonally-laid Kauri panelling forms some of the interior lining.

The surrounding garden includes some mature trees, in particular cypresses.

Landscape: The significant landscape around St Pauls Catholic Church consists of mature trees.

Two rows of Bhutan Cypress (*Cupressus torulosa*) are located on the north and west boundary lines of the churchyard. Two mature specimen trees, an Elm (*Ulmus procera*) and an Ash (*Fraxinus excelsior*), are located on the southern side of the church.

The remnant trees are of local interest as they provide a contemporary setting with the church. They form a prominent local landmark on the Sydney Road frontage. Whilst this style of planting is typical of churchyards from this period, it is not commonly seen in the City of Moreland.

Key Architectural Elements: face red brick tower with full Latin cross plan with very long nave

Mature plantings, including cypresses

Conservation Guidelines: remove protective covering from west window

Principal Historic Themes: establishment of permanent places of worship

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
