## Statement of Significance

Last updated on - April 7, 2021

Whitby House is of state historical and architectural significance. It is one of the earliest surviving buildings in Brunswick, and the only surviving building of this period associated the establishment of 'gentlemen's estate's on Brunswick's early farming allotments. These were established by businesspeople and merchants, who often built fine architect-designed houses set in extensive grounds.

Whitby House is a modest example of the uncommon Gothic style, relatively few of which were built during a period in which the classical architectural vocabulary held sway. It is an example of the work of John Gill, an important Melbourne architect in the 1850s-60s.

Whitby House is significant within Brunswick for its association with noted local figures Edward Whitby and Graham Ferry. It is in a prominent location in a predominantly single storey street and is a local landmark.

## Physical Description 1

Whitby House is a predominantly single storey brick house with some Gothick elements. It has steeply pitched gabled roofs with small dormers and paired octagonal chimneys. The gutter boards and bargeboards have curved timber fretwork. Terracotta ridging (in two different patterns) appears to have been added at a much later date. Windows are a combination of timber-framed casements and double-hung sashes, and the east elevation has a small oriel window. Some windows have awning highlights and simple rendered mouldings. Beneath the main gable on the south elevation is an unusual moulded panel bearing the name, Whitby, and the date 1848.

The house is in generally poor condition. Its conversion into flats has included the addition of several skillion-roofed rooms and carports between the original wings. Some of the face red brickwork has been exposed at ground floor level, and much of the rendered surface is deteriorating.

### Key Architectural Elements:

Unusual Gothic Revival style  
distinctive detail windows, chimneys, bargeboards

### Conservation Guidelines:

Repair deteriorated joinery  
reinstate sympathetic front fence and gates  
reconstruct missing decorative details  
preferably remove unsympathetic 20th century additions

### Comparative Examples:

Glenfern, East St Kilda (1850s)  
Coriyule Homestead, Drysdale (Charles Laing, 1849)  
Old Geelong Grammar School, Corio (Backhouse and Reynolds, 1857)  
Longeranong Homestead (1850)  
The Hawthorns, 5 Creswick Street, Hawthorn (1847)
