Statement of Significance

Last updated on - July 6, 2004

Location or Context:

A tree which occurs in a unique location or context and so provides a contribution to the landscape.

Rare or Localised:

A tree of a species or variety that is rare or of very localised distribution.

A tall thin specimen rare in cultivation in Victoria. It is growing in a closed forest of exotic plantings in a gully below the main garden. Unfortunately, the tree is crowded from above. Remnants of a legacy established by the original owner, Charles Kauper in the late 1800s, with the assistance of his friend Baron von Mueller. Many European trees were introduced to landscape the valley with its natural waterways and springs.
