Location

Sunbury Primary School, The Avenue,, SUNBURY VIC 3429 - Property No T11423

Municipality

HUME CITY

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 10, 2004

Rare or localised

Located in the playground of the school on the site of the former Caloola Centre, this is a large example of a species uncommon in cultivation in Victoria. This species is native to California and is unique in having flattened branchlets always lying in one plane, to form a 'spray', instead of bristling all around the twig as in most other species of Cypress. The tree has suffered wind damage in its upper crown, causing the mis-shapen top.

Measurements: 21/07/1994

Spread (m): 15.8

Girth (m): 4

Height (m): 18

Estimated Age (yrs): 100

Condition: Good

Access: Unrestricted

Classified: 08/09/1994

Other Names Macnab's Cypress, Cupressus,

Hermes Number 70923

Property Number
