Statement of Significance

Last updated on - October 6, 2011

Horticultural value
Contribution to landscape of historic garden
Rare or localised

This is an attractive tree displaying a compact canopy, light green colour, with leaves turning yellow in Autumn. Other known examples occur at Camperdown, Castlemaine and the Royal Botanic Gardens. The leaves are large and the lobes round with the whole under-surface covered in a close down. *Acer opalus* (Italian Maple) is native to the hills and mountains of southern and western Europe. This species is rare in cultivation and is no longer available in the nursery trade.

Located near 'The Gong' in the upper garden

Measurements: 11/1985

Spread (m): 10
