Statement of Significance

Last updated on - June 11, 2004

Horticultural value

Contribution to landscape of historic garden

Outstanding example of species

Located in shrubbery south-west of tennis court.

Syn. *Quercus 'Firthii'*. The seed of this tree is believed to have come from Sefton at Mt Macedon and is thought to be a natural hybrid between *Quercus phellos* & *Quercus rubra*. A smaller specimen occurs on the edge of the circular drive at the front of the house. Other known specimens occur at Firth Park (Wombat State Park), Creswick Nursery (beside lake) and Durrol, Mt Macedon
