National Trust

Statement of Significance

Last updated on - January 15, 2008

Horticultural value
Rare or localised
Outstanding size
Curious growth form
Outstanding example of the species

This multi-stemmed form of this tree, planted circa 1871, is most unusual and spectacular. It has 38 stems at breast height. The Wombat Park garden is of horticultural and historic significance itself and contains some of the oldest cultivated trees in the district.

The garden was first planted in the early 1850s and continuously developed throughout the nineteenth and early

twentieth centuries.

Both the house and the garden are classified of State Significance

Measurements: 25/06/2006
