Heritage Inventory (HI) Number

H7723-0591

Heritage Listing

Victorian Heritage Inventory

Interpretation of Site Heritage Inventory Interpretation: Shallow alluvial gold workings.

Hermes Number 8219

Property Number

History

Heritage Inventory History of Site: It is not known when this site was worked. It predates the construction of the Coliban Channel, which cuts the site. The Channel was built in the 1870s. The workings may be associated with the construction of the railway, circa 1862, as the earth works could be interpreted as being designed to divert the creek away from the railway.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
